

3 May 1961

STAT

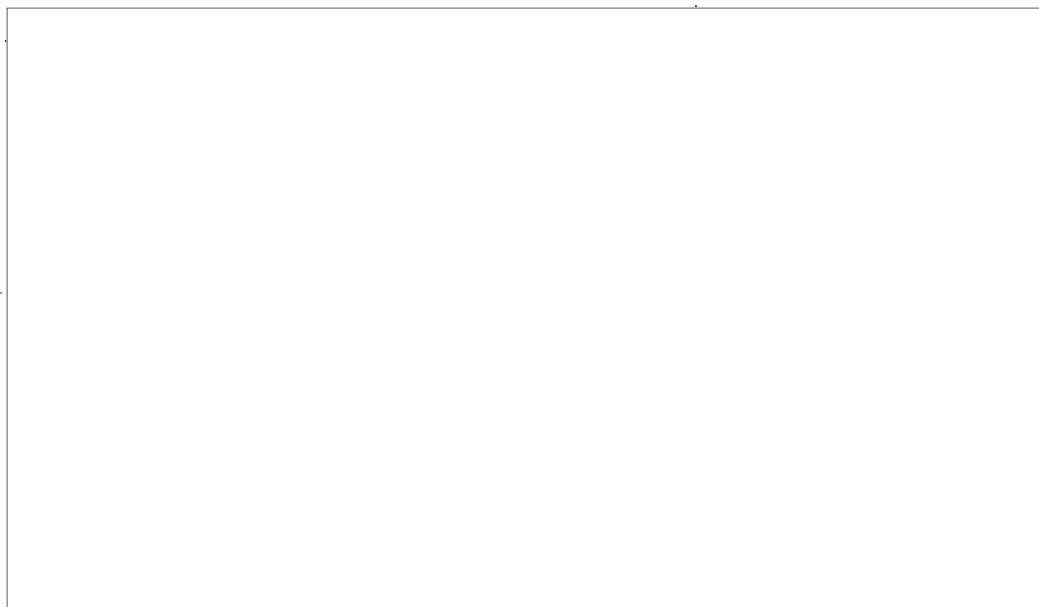

Dear 

STAT

The following unsolicited proposals which   
received from you under cover of your memorandum of 23 February  
1961 have been studied by those individuals of the Center who are  
directly concerned with them:

STAT

STAT

We greatly appreciate the opportunity to review these proposals, but at present we are not in a position to take positive action on any one of them.

For your information, the initiative which we might take in certain areas suggested by these proposals is not solely our option, and in other instances we have already taken steps to implement earlier planning.

Although we believe we are fairly well equipped to effectively handle and analyze high resolution photo materials, we will always welcome the opportunity to review new developments in this field which you may see fit to call to our attention. I assure you that your interest in our development problems is welcome.

Sincerely,

  
Executive Director
